

Fuel Filtration

For Immediate Release

SCHROEDER INDUSTRIES INTRODUCES ECONOMY ELEMENT FOR IN-LINE COALESCING FILTER | ICF | C184Z7VE

March 2016 | Leetsdale, PA

Leetsdale, PA - Schroeder Industries, a recognized leader in filtration and fluid conditioning products, releases the Economy Element for In-Line Coalescing Filter | ICF | C184Z7VE.

A new low cost coalescing element for the In-line Coalescing Filter ICF is now available. The design of the element has been optimized for a low cost water removal solution with higher dirt holding capacity, which makes it ideal for in-line, single pass applications where space is restricted (e.g. on fuel dispensers) and a particulate and coalescing filter combination would be too big.
