For Immediate Release

SCHROEDER INDUSTRIES INTRODUCES

High Viscosity Mobile Filtration Systems | MFD-MV

January 2016 | Leetsdale, PA

Leetsdale, PA - Schroeder Industries, a recognized leader in filtration and fluid conditioning products, releases the High Viscosity Mobile Filtration Systems | MFD-MV.

The line of high viscosity filtration carts has been expanded with the introduction of the MFD-MV. The MFD-MV is capable of handling fluids of up to 5,000 SUS, at 6 or 10 gpm, bridging the gap between the regular carts and the MFD-HV high viscosity cart for fluids up to 10,000 SUS

The MFD-MV is a compact, self-contained filtration system equipped with high efficiency, high capacity elements capable of removing particulate contamination and/or water quickly, conveniently and economically. It is perfect for cleaning up existing systems as well as for prefiltering new fluids, since new fluids often have contamination levels significantly higher than that recommended for most hydraulic systems.

MFD-MV

About Schroeder Industries

Schroeder Industries, an ISO 9001: 2008 certified company, designs, manufactures and markets filtration products for the hydraulic and lubrication, filter systems, process and fuel industries. Their expertise in filtration technology, superior filter and element technology capabilities, dedication to customer service and product support are the reasons Schroeder is a worldwide leader in Advanced Fluid Conditioning Solutions®.
