# CLEAN FLUID + MEASURABLE RESULTS INDUSTRIAL & MOBILE MARKETS

## MFD w/ HY-TRAX® | Fluid Condition Monitoring Cart

- On-board HY-TRAX® sampling system for real-time fluid condition monitoring
- Staged filtration cart for particulate and/or free water removal in hydraulic oils up to 2500 SUS
- Quick clean-up of existing systems and prefilter of new fluids to desired ISO level

## AMFS | Asset Management Filtration Station®

- Complete fluid management system to monitor fluid condition, filter out contaminants and track data by asset name
- Auto record-keeping, trending and analysis of fluid with on-board PC
- Ideal for managing multiple equipment assets

## TMU | TestMate® Contamination Monitoring Unit

- Rugged design for easy field sampling of mineral oils for contamination levels in bulk storage, transfer and dispensing
- Field testing can be accomplished either in-line, by bottle, or by sampling directly from the tank
- The measurements are recorded and easily recovered using a memory stick or through Bluetooth® wireless technology

## CTF60 | Top-Ported Pressure Filter

- Effective Filtration Solution for Mobile Vehicles and Mining Technology
- Offered in pipe, SAE straight thread, flange and ISO 228 porting
- Thread on bowl with optional drain plug for easy element service
