

Hydraulic & Lube Filtration

For Immediate Release

SCHROEDER INDUSTRIES INTRODUCES

High Pressure Filter | PLD

July 2013 | Leetsdale, PA

Leetsdale, PA - Schroeder Industries, a recognized leader in filtration and fluid conditioning products, introduces its new High Pressure Filter | PLD, a 3000 psi duplex filter.

Critical high pressure machinery, like turbines, gear boxes and bearings often cannot be easily shut down in order to change a filter element. For these applications, duplex filter housings are necessary to ensure continuous operation.

PLD

The PLD is a 3000 psi, 100 gpm duplex filter housing with an integrated transfer valve to provide continuous operation. Available in 10 inch or 16 inch Schroeder Z-Media® with two porting options: SAE-24 and 1.5 inch SAE 4 bolt code 61 flange. The integrated bypass valve is rated for 102 psid with an indicator trip setting of 70 psid.

About Schroeder Industries

Schroeder Industries, an ISO 9001: 2008 certified company, designs, manufactures and markets filtration products for the hydraulic and lubrication, filter systems, process and fuel industries. Their expertise in filtration technology, superior filter and element technology capabilities, dedication to customer service and product support are the reasons Schroeder is a worldwide leader in Advanced Fluid Conditioning Solutions™.
