BOOTH #301

## MCO | Mechanical Clean Oil Dispenser

- Integrated mechanical pressure drop limiting valve prevents unfiltered fluid from reaching the point of use, and directs the fluid back to the point of origin (i.e. reservoir or tote)
- Ideal for dispensing applications where the distribution of clean fluid is critical

## Tank-Mounted Filters | LRT & ART

- Compact, lightweight, low pressure tank-mounted filters, ideal for conditioning fluid on mobile equipment (e.g. refuse truck)
- ART aluminum alloy is designed to be water tolerant - anodization is not required for use with water based fluids (HWCF)

## BDFP | Bulk Diesel Filtration Panel

- A simple, turn-key fuel filtration solution ideal for fuel transfer and kidney-loop applications
- Incorporates our patented fuel filtration products to improve performance and capacity
- Available in 14 or 25 gpm configurations with your choice of an electric motor or through the means of an air-operated pump

## GeoSeal® | Patented Aftermarket Protection

- Patented aftermarket protected offering for OEM's to retain replacement element business
- The critical sealing arrangement of a GeoSeal® filter element and the filter housing takes on a shape other than the standard circular arrangement
